n-Track Studio 6.0.9 Released with new nVocal plug-in

The free updated adds a new plugin dedicated to processing of Vocals tracks

Rome, Italy, 3-29-10. Starting today n-Track includes the brand new nVocal plug-in, a all-in-one tool for processing vocals tracks. With a number of useful presets to start from, the plug-in allows easy processing of vocal tracks without the need to hand pick among numerous discrete effects.

A modular design, nVocal includes warmer, compression, de-esser, EQ, Presence, noise-gate effect modules that can be stacked in any possible combination.

The 6.0.9 update, free for v6.x registered users, also includes a number of new features, such as native support for Behringer BCF2000 MIDI hardware control surface, improved performance and bug fixes.

n-Track Studio works with Windows 2000, XP, Vista and Windows 7, and is available in 32 bit and 64 bit versions. It supports VST and DirectX plugins and instruments, Rewire connections and multichannel Asio, WaveRT, MME and WDM audio drivers. n-Track is available in English, Italian, French, German, Spanish and Danish languages. n-Track Studio is the perfect software for small recording studios and hobbyist musicians that want to record and produce their own music.
